Volume 6, Issue Nos 1–6

PACKAGING TECHNOLOGY AND SCIENCE

VOLUME 6, ISSUE No. 1 January–February 1993

Symposium Report 1

Application of Frequency Domain Analysis in the Testing of Packages: M. A. Sek and V. Rouillard 3

Simulation of the Dynamic Behaviour of Packaged Products: W. C. du Pré 13

Development of Plastic Bottles Resistant to Lateral Deformation: D. Tsiourvas, J. Pagidas and A. Stassinopoulos 23

Packaging Aspects of High-pressure Food Processing Technology: B. Mertens 31

Feasibility of Using a Non-destructive Ultrasonic Technique for Detecting Defective Seals: Y. Song, H. O. Lee and K. L. Yam 37

Factors Affecting the Suitability of Glass Jars for Heating in Microwave Ovens: Comparison with Plastic Jars and Paper Board Tubs: R. Ahvenainen and R.-L. Heiniö 43

News Items from Around the World 53

Dates for Your Diary 59

VOLUME 6, ISSUE No. 2 March–April 1993

Announcement iii

News Items from Around the World 61

Sealing of Packaging Sheets using High-frequency Techniques: U. Ernst 63

Changes in Oxygen Concentration and Volume of Gas-flushed Plastic Pouches during Storage: T. Ishitani and T. Inoue 69

The Development of a Strategic Information System Applied to Packaging Design: T. Shimada and K. Yamasaki 79

Indexed or abstracted by 'CAB Abstracts', 'Cambridge Scientific Abstracts', 'Chemical Abstracts Service', 'Engineering Index', 'Environmental Periodicals', 'Materials Information', 'Packaging Technology Abstracts', 'Rapra Abstracts/On line Database'.

Permeation of Volatile Organic Compounds across Polymer Films—Part I: Development of a Sensitive Test Method Suitable for High-barrier Packaging Films at Very Low Permeant Vapour Pressures: R. Franz 91

Quantification of the UN Leakproofness Test Method: A. A. Schilperoord and M. A. A. M. Schets 103

VOLUME 6, ISSUE No. 3 May–June 1993

Conference Report—Pira Stages World's First Conference on Intelligent Packaging: F. A. Paine 113

Intelligent Packaging in Pursuit of Customer Needs: A. J. Braley 115

Anhydrides as Antimycotic Agents Added to Polyethylene Films for Food Packaging: Y.-M. Weng and J. H. Hotchkiss 123

Effect of Plastic Coating on the Sensory Properties of Fibreboard-based Packaging Materials in Microwave Oven Heating: R.-L. Heiniö, T. Sipiläinen-Malm and R. Ahvenainen . . . 129

Method for Deriving the Correlation Between Free Fall and Shock Machine Drop Height: F. Li, D. Twede and J. W. Goff 139

Microbiological Quality and Shelf-life of Chilled Cod Fillets in Vacuum-skin and Modified Atmosphere Packaging: A. Galli, L. Franzetti, S. Carelli, L. Piergiovanni and P. Fava . . 147

Selecting a Waste Management Option using a Life-cycle Analysis Approach: N. Kirkpatrick 159

VOLUME 6, ISSUE No. 4 July–August 1993

Measuring the Package Shipping Environment in Refrigerated Ocean Vessels: S. P. Singh, G. J. Burgess, J. A. Marcondes and J. R. Antle 175

Practical Experiences of Sensory Investigations into the Packaging of Vegetables: J. D. Selman 183

Evaluation of the Ethylene Permeability of Polyvinyl Chloride (PVC): E. Savoie, J. C. Gagnon, G. J. Doyon and F. Brunet 195

Use of Dielectric Constants in the Prediction of 'Flavour Scalping': M. A. Tigani and J. S. Paik 203

After-ripening of Fruits Adjusted by Ethylene-generating Agents: M. Futura, S. Asano and S. Imai 211

Study of Static Cushioning Properties: Automated Data Input and Reliability Test of Static Cushioning Properties: Y. Teragishi, T. Takada, T. Nakajima and R. Nogami 221

VOLUME 6, ISSUE No. 5 September–October 1993

Editorial Comment: F. A. Paine 235

Conference Report—PROPACK 93, the Packaging Function: Environmental Issues Today and Tomorrow 237

Relationship between Seal Strength and Burst Pressure for Pouches: K. L. Yam, J. Rossen and X.-F. Wu 239

Model of Respiration for Fresh Produce in Closed Systems: 1. Evolution of Oxygen in the Case of Tomatoes: J. Brion, D. Daumont, J. Malicet, C. Augusto and B. Pascat. 245

Determination of Water Uptake and Moisture Sorption Isotherms of PVC-based Food Packaging Materials: Effect of Plasticizer Content and Temperature: P. J. Kalaouzis, P. G. Demertzis and M. G. Kontominas 261

Proposed Method to Test the Relative Seal Strength of Plastic Bottles and its Use in Optimizing Sealing Parameters: S. P. Singh, G. J. Burgess and H. E. Lockhart 271

Deficiencies of Polypropylene in its Use as a Food-packaging Material—a Review: J. Boone, F. Lox and S. Pottie 277

News Items from Around the World 283

Dates for Your Diary 285

VOLUME 6, ISSUE No. 6 November–December 1993

Comment 287

Conference Report from Cork, Eire 289

Packaging and World Class Competitive Products: D. Fowler 291

Quality of Food Contacting Materials with Respect to Migration: an Advanced Testing Methodology Applied During Microwave Heating: F. Lox 297

Modelling of Oxygen Diffusion through a Model Permeable Package and Simultaneous Degradation of Vitamin C in Apple Juice: F. H. Barron, B. Harte, J. Giacin and R. Hernandez 301

Finite Element Computer Simulation of Oxygen Diffusion in Packaged Liquids: F. H. Barron, B. Harte, J. Giacin, R. Hernandez and L. Segerlind 311

Book Reviews by the Editor 323

Conference Report from Gothenberg, Sweden 329

News Items from Around the World 331

News of Recent Packaging Developments in Greece: N. G. Karakasides 337
